## CAREER SUMMARY

### Quality Assurance Specialist • Automation Test Engineer • SDET • DevOps Engineer

- **An organized, meticulous professional** with 4+ years of experience influencing business results through strong automation skills, leadership, knowledge of agile methodologies and a relentless focus on quality of the software products.
  - **A diversely skilled QA Engineer with knowledge across most functions** - establishing test automation strategy and framework/architecture, coding, DevOps processes. Planning, designing, implementing, and maintaining test cases, test scenarios and deliver feedback and reports.
  - **A proactive contributor who excels in delivering the right product, solution, and support** - Comfortable working in a fast paced, highly collaborative, dynamic work environment.
- 

## AREAS OF EXPERTISE

- |                                     |                           |                        |
|-------------------------------------|---------------------------|------------------------|
| ▪ Agile Methodologies / Scrum       | ▪ Java and C#             | ▪ Security Testing     |
| ▪ API Testing                       | ▪ Jenkins                 | ▪ Selenium             |
| ▪ Automation framework architecture | ▪ Jira / Confluence / TFS | ▪ SoapUI               |
| ▪ Azure DevOps                      | ▪ JMeter                  | ▪ TDD/ BDD/ ATDD       |
| ▪ CI/CD pipeline                    | ▪ Linux and Shell scripts | ▪ Training & Mentoring |
| ▪ Docker                            | ▪ MS SQL                  | ▪ Unit Testing         |
| ▪ GIT                               | ▪ Performance Testing     | ▪ Web Technologies     |
|                                     | ▪ QA Methodologies        |                        |
- 

## PROFESSIONAL EXPERIENCE

**Siemens Healthineers**, Bangalore

**May 2021 – Present**

*Parent company for several medical technology companies, improving patient experience all enabled by digitalizing healthcare.*

### Software Development Engineer Test

Brought in as a SDET to work closely with the distributed teams to understand features and technical implementation, enhance the frameworks that support Functional, Performance as well as API level testing.

- **Active involvement in different types of testing:** API - SoapUI, Performance - JMeter, UI automation - C#, FlaUI, and Selenium, Security testing - PenTest.
- **Created an interactive dashboard for load test reports** - automatically install the latest build, execute, and display the results in graphs to analyze the behavior of the system over time. Used SoapUI, Python, Pandas, Plotly, and Dash.
- **Working on Azure DevOps** to introduce the DevOps culture to the team.

**Dassault Systèmes**, Pune / Bangalore

**Apr 2020 – May 2021**

French software company that develops 3D design, 3D digital mock-up and Product lifecycle management software.

### **R&D Quality Assurance Engineer**

Review the documents received for R&D, ensure proper Stage Gate compliance at every stage of product development. Later promoted to be part of the core automation team.

- **Continually improve efficiency of the test processes which were followed** – coming up with different POCs for CI, distribution and parallel testing, reporting, enhancement of existing framework.
- **Designing and developing automation scripts** – for Web, Windows and Mobile application using Sahi, Sikuli, Java, TestNg, and Maven. JMeter for API and Load testing.
- **Worked on different DevOps tools** – Jenkins, Docker, and Kubernetes.
- **Awarded ‘Evangelist – Passion to Learn’** – identified as a valuable player who rapidly assimilates to new technologies.

**LTI - Larsen & Toubro Infotech**, Pune

**Sep 2017 – Apr 2020**

Global technology consulting and digital solutions company with operations in 30 countries.

### **Software Development Engineer in Test**

Initially hired as a Graduate Engineer Trainee then promoted to SDET. Served as a key member of Test Automation for 4 different complex projects.

- **Sole ownership of automation** – Introduced BDD - Cucumber and developed an UI Automation framework from scratch using C#, NUnit, SpecFlow, Selenium, SQL, POM design pattern and GIT for source code management, Continuous testing using Jenkins, API testing using SoapUI.
- **Followed pure SCRUM agile methodology** – Active participation during different sprint ceremonies. Estimating, prioritizing, and executing quality testing activities. Collaborating with Software Developers for issue triaging and debugging.
- **Received many Client appreciations and ‘Pat on the back’ award** – for consistent good work and many successful product deployments.

---

## **EDUCATION**

### **Bachelor of Engineering**

**Information Science & Engineering** (2017)

PESIT – South Campus, Bangalore

Was part of college Basketball team, Creative department, and IEEE student club.
